

Trading update 3rd quarter 2019

Year-to-date revenues amount to 251.8 MEUR versus 258.4 MEUR in 2018, 2.6% below the comparable number for the same period in 2018.

Revenue during Q3 was 74.2 million euro, 4.1% lower compared to the same period in 2018.

Year-to date, the JENSEN-GROUP received 227.3 million euro orders, 1.1% above the same period of 2018.

The JENSEN-GROUP expects lower revenue and lower profitability for 2019 compared to 2018, excluding the impact of hurricane Michael for which the insurance settlement is not final. This is mainly driven by lower large project sales in Western Europe and Asia. We see continued strong sales in single machines and systems. We have taken necessary steps to adapt production capacity and we are working on reducing overhead. Our growth strategy is built on single machine, systems and large project sales and we are positive that our continued investments will bring us back to growth as soon as the current economic uncertainties disappear.

The most important risk factors remain an uncertain political climate, rapid changes in demand, availability of financing to our customers, high exchange rate volatility and fluctuating raw material, energy and transport prices.

 Michael the 10th of October 2018, progresses and discussions with the
