

Jenstack OT

Top-quality stacking by
Over Turning function

JENSEN®

Principle sketch
Over-Turning and stacking

Application

Top-quality stacking of folded linen by clamp device using over turning function.

Operation

The folded linen arrives from the cross folder and stops when the folded side of the linen enters a clamping device. The clamping device grasps the piece and turns it 180° over onto a conveyor in a fast and precise pivoting movement. In this way the piece is held, squeezed and pressed at the same time before being placed precisely on top of the stack. When the pre-selected number has been reached the stack is automatically ejected.

Models/capacity

Integrated stacker controlled by the folders' PLC.

Max. capacity: up to 1200 pieces per hour.

Max. stacking size: 830 x 600 mm.

Max. stacking height: 350 mm.

Installation

JENSEN is pleased to assist you in planning your laundry providing excellent consulting, layouts and technical data. Authorized JENSEN distributors or JENSEN engineers should carry out the installation to ensure the correct performance.

Service

In addition JENSEN provides an extraordinary after sales service through a worldwide network of highly qualified Sales and Service Centers and distributors, all with their own maintenance and spare parts services.
